About This Game

TerraTech is an open-world, sandbox adventure game, where you design and build your own creations through a mix of crafting, combat and discovery. Explore a hostile alien landscape, or design with creative freedom. The choice is yours.

CAMPAIGN WORLD

CREATIVE SANDBOX

GAUNTLET CHALLENGE

Start your career as an Intergalactic miner on a randomly generated infinite world in search of profit and glory in Campaign, sit back and build to your hearts content in Creative mode or pit your Techs against the clock and dare to run the Gauntlet Challenge. There are many game modes available in TerraTech to stretch your Tech building imagination to the limits!

Story

In the distant future, Earth's natural resources have been depleted, and as a resource-gathering prospector it's your job to travel to alien planets and scour them for valuable materials. But you are not alone! Rival prospectors litter the landscapes of these new worlds, and will fight to protect what's theirs, and invade to take what's yours. To make your mark, you will need to be cunning and creative.

CONSTRUCTION

Using the building blocks, guns, wheels, and wings from several Mining Corporations, you can build varied Techs to suit every purpose. Be it powerful armoured combat vehicles, unstoppable resource gathering machines, sprawling resource processing bases or a hybrid of all three - creativity is your key to exo-planetary success.

EXPLORATION

The worlds in TerraTech are procedurally generated and infinite, so there are always new lands to discover and more resources to find. Treacherous mountain ranges, luscious grasslands and huge deserts are among the biomes you will encounter. More will be added as development progresses.

COMBAT

The intergalactic mining industry is a profitable one, but you are not the only miner in search for new worlds to exploit. Defending yourself from rival miners will take time, resources and skill, with success leading to new territory and new lands. All equipable blocks and items can be damaged or destroyed, so ensuring you are sufficiently armed and ready for battle is a key element of both survival and prosperity in TerraTech. Get out there and show them who's boss!

CRAFTING

By gathering and processing natural resources, players are able to construct storage, refining and construction bases in order to craft new blocks in the game. Like the look of that Venture Hail Fire Rifle that just tore your vehicle apart? Go prospecting for the needed resources, and craft a couple for yourself in the shiny new Venture fabricator which you just acquired, by beating their time trial challenge in the nearby mountains.

CORPORATIONS

All exo-planetary miners buy parts from the established Mining Corporations, which each have their own specific brand of mining technology. Get the job done with GSO, zoom around with high-performance recon specialists Venture, strip-mine to the max with the heavy-duty GeoCorp or act with military efficiency utilizing the stealth focussed Hawkeye. New Corporations we're aiming to add to the game include deranged experimental scientists Reticule Research, technological superiority giants Better Future and the hive-mind AI swarms of LEGION. Completing missions and discovering blocks for each Corp will improve your standing with them, and gain access to the more sought-after components in their arsenal.

This is an Early Access game, with everything that implies. Please check the System Requirements to ensure your PC is compatible.

Title: TerraTech
Genre: Action, Indie
Developer:
Payload Studios
Publisher:
Payload Studios
Release Date: 10 Aug, 2018

a09c17d780

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7 64-bit

Processor: Intel Core2 Duo T7600 @ 2.33GHz or AMD Athlon 64 FX-60 Dual Core

Memory: 4 GB RAM

Graphics: nVidia GeForce 520M or Intel HD 4000

ITS A GOOD game. This game is SO FUN!!!. its like roblox but retard eddition why cant i be the human wtf wheres megatron isnt this the roblox transformes game. dont get scammed like i did just play the real thing not the boot leg version. Pretty fun game. use your imagination, thats the key. Enemy spawn points are not thought out properly, making new start very annoying and unable to defend against enemies that spawn near your base when you arent even there.. Awesome game. Runs great on Fedora 29
